

## The Anglo-American Future (Classic Reprint)

Excerpt from The Anglo-American Future  
IF the key to the puzzle of this distracted world can be said to rest in any Single fact, it is to be found in the relations of the British Commonwealth and the American Commonwealth. The war has scrapped the European system, and with it the whole political mechanism of pre - war society. In that society Europe was alike the brain and the power-house. From the general current of the worlds affairs, the American continent stood aloof by tradition and interest. It was self-contained and sufficient to itself. It would have no integral association with European politics, nor would it permit Europe to acquire new sovereign rights in its own soil. The doctrine of isolation laid down by the Fathers of the United States Republic was in principle extended to the whole continent by President Monroe. It is pertinent to remind ourselves that in this extension English statesmanship played a significant part which will be worth attention in a later connexion.
