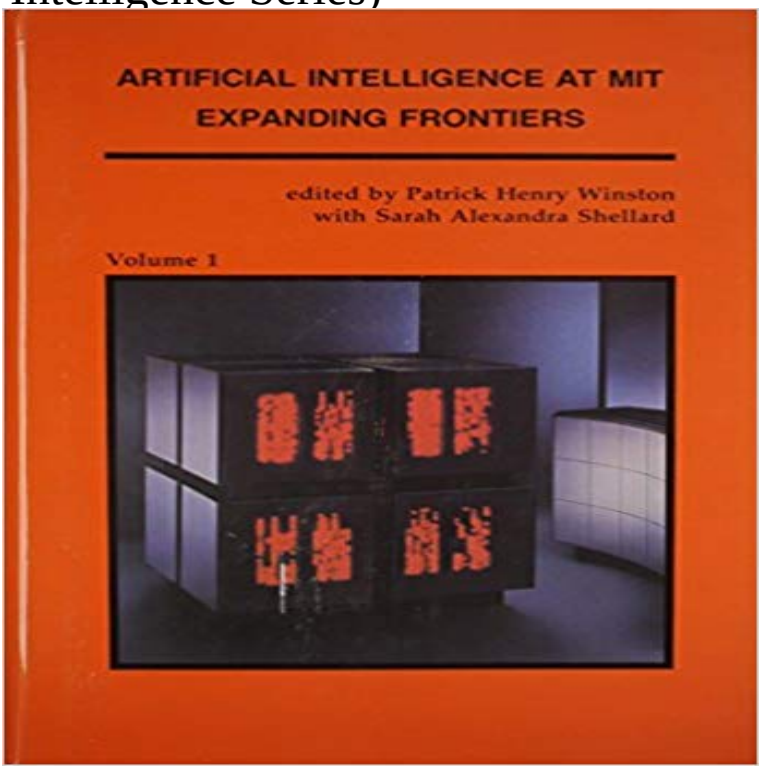
Artificial Intelligence at MIT: Expanding Frontiers (Artificial Intelligence Series)



This collection of over 40 milestone contributions presents the latest state-of-the art research emerging from one of the worlds foremost centers for Artificial Intelligence. The topics range from immediately applicable, demonstrated advances to theoretical proposals. They include robotics, vision, natural language, learning and commonsense problem solving, model-based reasoning systems, engineering problem solving, programmers apprentice, mixed symbolic and numerical computation, ultraconcurrent systems, and basic theory. Each new area is introduced and linked together with an overview by Patrick WinstonThe contributors are: Harold Abelson, Gul Agha, Chae H. An, Christopher G. Atkeson, David J. Bennett, Robert C. Berwick, David Brock, Rodney A. Brooks, William J. Dally, Randall Davis, Bonnie J. Dorr, Brian Eberman, Michael Eisenberg, Sandiway Fong, W. Eric L. Grimson, Matthew Halfont, Walter C. Hamscher, Carl Hewitt, Jessica Hodgins, John M. Hollerbach, Berthold K. P. Horn, Joseph L. Jones, Boris Katz, Jacob Katzenelson, Christof Koch, Tomas Lozano-Perez, Michael Levin, Matthew T. Mason, Emmanuel Mazer, David A. McAllester, Marvin Minsky, Patrick A. ODonnell, Tomaso Poggio, Marc H. Raibert, Sajit Rao, David J. Reinkensmeyer, Charles Rich, Elisha Sacks, Kenneth Salisbury, Warren P. Seering, Neil C. Singer, Gerald J. Sussman, Russell H. Taylor, Vincent Torre, William Townsend, Shimon Ullman, Karl T. Ulrich, Richard C. Waters, E. J. Weldon Jr., Brian Williams, Linda Wills, Patrick H. Winston, Jack Wisdom, and Kenneth Yip.Patrick H. Winston is Professor of Electrical Engineering and Computer Science and Director of the Artificial Intelligence Laboratory at MIT. Sarah A. Shellars is an editorial assistant at the Artificial Intelligence Laboratory. Artificial Intelligence at MIT is included in the

Artificial Intelligence Series, edited by Michael Brady, Daniel Bobrow, and Randall Davis.
