

## GATEKEEPER OF THE PORTAL

Dylan Pryce was a scientist working on the development of cutting edge technology until that fateful day when the man in charge of a top-secret project showed him something beyond belief. The subsequent murder of the man resulted in him being forced into retirement at the family home on the Gower Peninsular in south Wales. Rather than a peaceful retirement Dylan was soon involved in a mystery concerning his stonemason ancestors. This soon involved working with a local spiritualist and healer as well as a local modern Druid. Another murder not far from where he lived within an ancient megalithic structure started an adventure that would take Dylan and his two friends into the world of alternative realities and a battle between two forces not of this world and their agents who were flesh and blood. The final showdown comes between two otherworldly forces to gain control of an interdimensional portal. The battle develops on two levels between mere mortals as well as beings from other dimensions of reality.
