

1-4-3

How do you begin to tell a love story? How do you know if your love story can capture the hearts of those who are reading, listening or watching it unfold before them? I guess the key is simply in the word heart. Tell it from the heart and you can't go wrong, no matter how unconventional the story may be. When fate strikes and Adam Hannah & Joshua Middleton meet at an audition, they soon find themselves instantly addicted to each other, despite one of them already being involved with someone. This leads to a situation that changes both of their lives forever, taking them both down a dark and deceptive path. One where pain is met equally with pleasure and jealousy goes hand in hand with complete joy. This unconventional love story answers two very important questions we all ask ourselves. Do we always want what we can't have? And, what do you say when for some reason you just can't seem to find those three little words?
