Fundamental Principles of Polymerization: Rubbers, Plastics, and Fibers Since there are over 60,000 different plastics vying for a place in the market, There are two basic types of polymerization, chain-reaction (or addition) and . does minimum damage to reinforcing fibers (in composites), and large parts are 2% of plastics, 29% of aluminum, 25% of paper, 7% of glass, and 3% of rubber and **Wiley: Fundamental Principles of Polymeric Materials, 3rd Edition** Fundamental principles of polymerization: rubbers, plastics, and fibers.
