

Chemical Water and Wastewater Treatment II: Proceedings of the 5th Gothenburg Symposium 1992, September 28-30, 1992, Nice, France

The biennial Gothenburg Symposia bring together administrators, engineers and scientists active in research and development of water supply, wastewater and pollution control. This book contains the contributions to the 5th Gothenburg Symposium (Nice, September 1992). Thirty-three contributions by leading experts deal with the question of floc formation, floc separation and with problems and practical solutions associated with chemicals and dosing control. Special attention is paid to the combination of chemical and biological processes for nutrient removal from wastewater. From the Contents: Floc Formation -. Floc Separation -. Chemicals - Dosing Control -. Drinking Water Treatment -. Wastewater Treatment -. Recent Developments in Wastewater Treatment.
