

My Experience with Spies in the Great European War

This book was published in 1916. From the Preface: This volume is offered the reader as a collection of chapters which treat of subjects that are closely allied to the great war in Europe which burst forth like an earthquake in 1914. Each one of the several topics has a place in the list of vital themes in an eventful epoch. The treatment is written in a narrative style, not technical, but quite fully conversational. In connection with a number of the chapters are stanzas of verses written especially for this book. In narrating many facts in regard to spies and scouts, the writer introduces the leading places visited in an eventful trip abroad. In the third chapter, entitled My Introduction to Spysdom, is the beginning of the list of chapters which recite the details of the object and work of spies. It must not be assumed that the writer condemns spies as workers of evil and iniquity. While these secret agents sometimes are false and detestable, sometimes vile and traitorous, they frequently do good and are the means of bringing about results by methods that operate quickly and in the end save life and property from destruction. Perhaps, in the wiser economy of war, it is impossible wholly to dispense with systems of espionage. The treatment in this book is from an American standpoint. It is the result of touring as a student and writer in twelve countries of Europe. The possibility of giving so much detail in regard to espionage is due to no mean ability to mingle freely with different nationalities and to converse with them in their own tongue. It is hoped that this volume will be read and pondered in the spirit in which it was written. If it contributes to the correction of wrongs suffered by Americans at sea, personally and commercially; if, at the same time, the reader is entertained and instructed, the purposes of the writer will have been accomplished.

.....
.....Book Excerpts:Miss Bross had reached the place by a different train than the one by which I came. She had been busy in the sunlight, she said, enjoying the open sky and the warm, autumnal breezes. To me her mission at Doberitz appeared very different. It seemed that she had no interest in the prison camp, that to her the sanitation and employment of prisoners was a blank book, but everything I mentioned about the drill of soldiers and the maneuvers of flying machines aroused her interest. To the one she was blind and to the others she was wide awake and far-seeing. The difference in her feeling on these topics deepened my suspicion that she was practicing a clever game of espionage.

.....
In the Swedish capital, the city of Stockholm, the secret service men likewise were abundant. They were active in the lobbies of the Grand, the Continental and the Central hotels. I met them in the city and in the suburbs, everywhere busy as bees. Here the work of spies was not so much concerned with commerce as with the study and direction of public sentiment, for which purpose they wrote for newspapers both in Sweden and in their own countries.....

.....The school in which I had suddenly become a student was interesting beyond my power to describe. They howled and roared like raving beasts that are seeking to devour each other. My eyes and ears were open every moment, permitting nothing to escape, while I said only sufficient to keep the trio busy in their eagerness to surpass each other in relating the smart stories with which detectives are familiar. In this manner I easily accomplished my purpose, that is, I learned much of the work and methods of secret agents in America and received the information which enabled me to find their compatriots in Europe.
