

## Nuclear Affairs

Its late 1952 when a nuclear experiment leads to radiation exposure of Navy personnel and a vengeful plot, further complicated by a Soviet agents inept operation and ultimate exposure. When Air Force personnel in Japan, specially trained in secret surveillance and analysis, unknowingly expose a conspiracy to pass sensitive material to Japanese communist agents and subvert a critical collection program, a mysterious death and torrid love affair ensue. A chance encounter in Waikiki puts the prime suspect on the run causing a diverse team of FBI agents and amateur sleuths, including the ill-fated victims wife, to pursue the fleeing killer. The beguiling widow plays a key role in the frantic pursuit on the volcanic slopes of the Big Island of Hawaii.
