

## Physical Abuse and Neglect: A Training Curriculum, Without CME/CNE

Law enforcement and social service professionals were consulted during the development of this curriculum to ensure that the content and format are appropriate for training in those fields as well. The curriculum is formatted for portable, straightforward learning as a whole or chapter-by-chapter and is accompanied by a supplementary CD. The CD contains 208 clinical photographs illustrative of common injuries, diagnostic imaging methods, and forms of neglect. Chapter activities, post-tests, registration forms, and an instructional PowerPoint presentation are also included on the CD. This title offers directed self-study opportunity. In addition to the continuing education edition of Physical Abuse and Neglect: A Training Curriculum, G.W. Medical is pleased to announce the release of a new sister product: a reference edition that contains all of the information and educational activities of the CEU version without the continuing education credits. This new product is designed to provide a substantially reduced pricepoint for programs and individuals who need the information, but not the credits.
