

Precision Assembly Technologies for Mini and Micro Products: Proceedings of the IFIP TC5 WG5.5 Third International Precision Assembly Seminar ... in Information and Communication Technology)

These contributions to the 3rd IPAS2006 seminar are grouped in 6 sections. Part 1 reviews new techniques for handling and feeding micro parts. Micro-robotics and robot applications for micro assembly are discussed in Part 2. An overview of different design and planning applications for microassembly is provided in Part 3. Part 4 covers reconfigurable and modular micro assembly systems and control applications. The economic aspects of microassembly including new business models are discussed in Part 5 while Part 6 presents specific technical solutions and microassembly applications.
