

# Stancetaking in Discourse: Subjectivity, evaluation, interaction (Pragmatics & Beyond New Series)

This volume contributes to the burgeoning field of research on stance by offering a variety of studies based in natural discourse. These collected papers explore the situated, pragmatic, and interactional character of stancetaking, and present new models and conceptions of stance to spark future research. Central to the volume is the claim that stancetaking encompasses five general principles: it involves physical, attitudinal and/or moral positioning; it is a public action; it is inherently dialogic, interactional, and sequential; it indexes broader sociocultural contexts; and it is consequential to the interactants. Each paper explores one or more of these dimensions of stance from perspectives including interactional linguistics and conversation analysis, corpus linguistics, language description, discourse analysis, and sociocultural linguistics. Research languages include conversational American English, colloquial Indonesian, and Finnish. The understanding of stance that emerges is heterogeneous and variegated, and always intertwined with the pragmatic and social aspects of human conduct.
